Control Valve M 323 | Vari Pumps | Double Acting

Product information

Control valve double acting M323 for Holmatro hydraulic VariPump models.

Features:

- Suitable for double-acting tools
- Handle with dead man's function, automatically goes to "O" position
- With pressure-controlled non-return valves for securing the load
- 4-way, 3-position
- The M304 (Sada switch for single & double use) can be added as an option for flexible use of your vari pump

To enable a safe & controlled way of working; make sure to complete you Holmatro PA hand pump or Varipump unit with the right control valve to regulate the oil flow in your system.

- For PA handpumps : the VM43L valve is optional to regulate your oil flow
- For vari pumps : an M311 (single acting), M322, M323 or M326 (double acting) valve is mandatory to regulate your oil flow
