

Inspection & testing of lifting equipment

Product information

Safety is essential when working with lifting and hoisting equipment such as lifting straps, chain assemblies, closures, lifting hooks, turnbuckles, winches, hoisting clamps, hoisting magnets, hoisting jigs, etc. Mostly an annual inspection is even required. Mennens performs all inspections and certifications either in our workshop or at your location. We also register the inspection or certification for you. Prioritize safety and have your lifting and hoisting equipment certified by Mennens.

Mennens is a member of the industry group 'Recognized Certification Companies for Lifting and Hoisting Equipment' (EKH). All our inspectors have extensive practical experience and inspect and certify according to the EKH work regulations, which are based on the latest European standards, the Commodities Act, manufacturer instructions, or local legislation.
