

Line feed clamps Click Ductor

Product information

RC-LCH + RC-LC80

General:

All line feed systems require clamp holders and feed clamps to connect the copper conductors within the rail housing to the cores of the supply cable.

There are 3 types of line feed clamps: RC-LC80, RC-LC110 and RC-LC200.

1 clamp per conductor needed.

For use with type line feed holder RC-LCH

Line Feed clamps:

Type RC-LC80

To be applied for mounting copper conductors Cu50 - Cu80. Click connection.

Type RC-LC110

To be applied for mounting copper conductors Cu110. Click connection

Type RC-LC200

To be applied for mounting copper conductors Cu125, Cu160 and Cu200. Screwed connection.

Blueprint

Technical data

Code	Description	Number	max. current (a) 100% I.D.	with type line feed holder
RC-LC-80	Feed clamp small RC-LC-80	1 per conductor	80	RC-LCH
RC-LC110	Feed clamp large RC-LC110	1 per conductor	110	RC-LCH
RC-LC200	Feed clamp RC-LC200	1 per conductor	160	RC-LCH
