

C-Profile R150

Product information

General:

The special shape of the profile guarantees smooth running of the cable trolleys. Therefore, mechanical resistance and wear of the trolleys remains low.

The profiles can also be used for outdoor applications or under dusty and humid conditions. The wheels of the trolleys clean the surface while running on it, so there's no gathering of dust etc..

Features:

- Standard length : 4 m (subdivisions possible).
- Material : zinc plated steel.
- Weight : 1,3 kg/m.
- Load capacity : 80 kg/m (support distance \leq 1 m).
- Maximum travelling speed: 60 m/min.

Optional:

Special executions : blank, zinc passivated or stainless steel.
